

Bartop Flat Pack Kit

Install the Speakers, Power Switch, Screws for Light, Lock for rear door, Power Plug and Hinges.

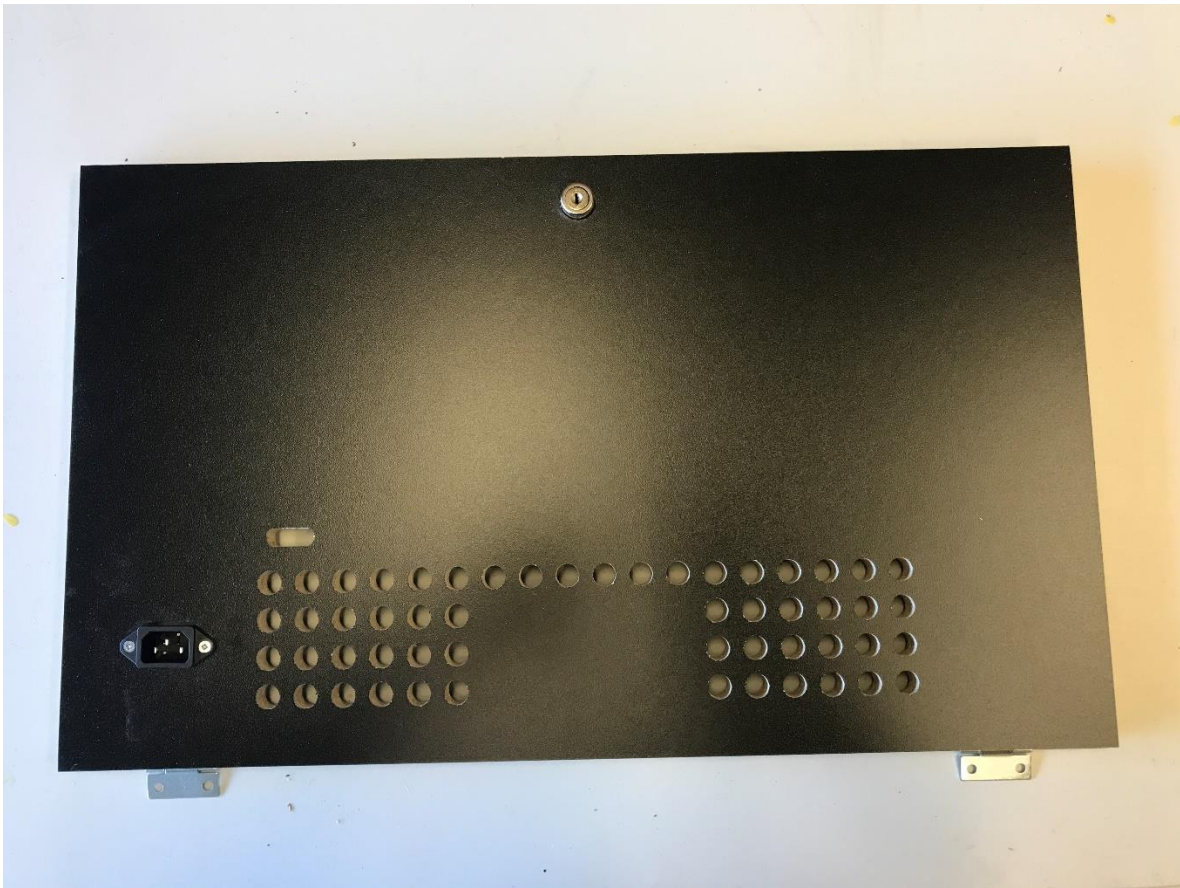

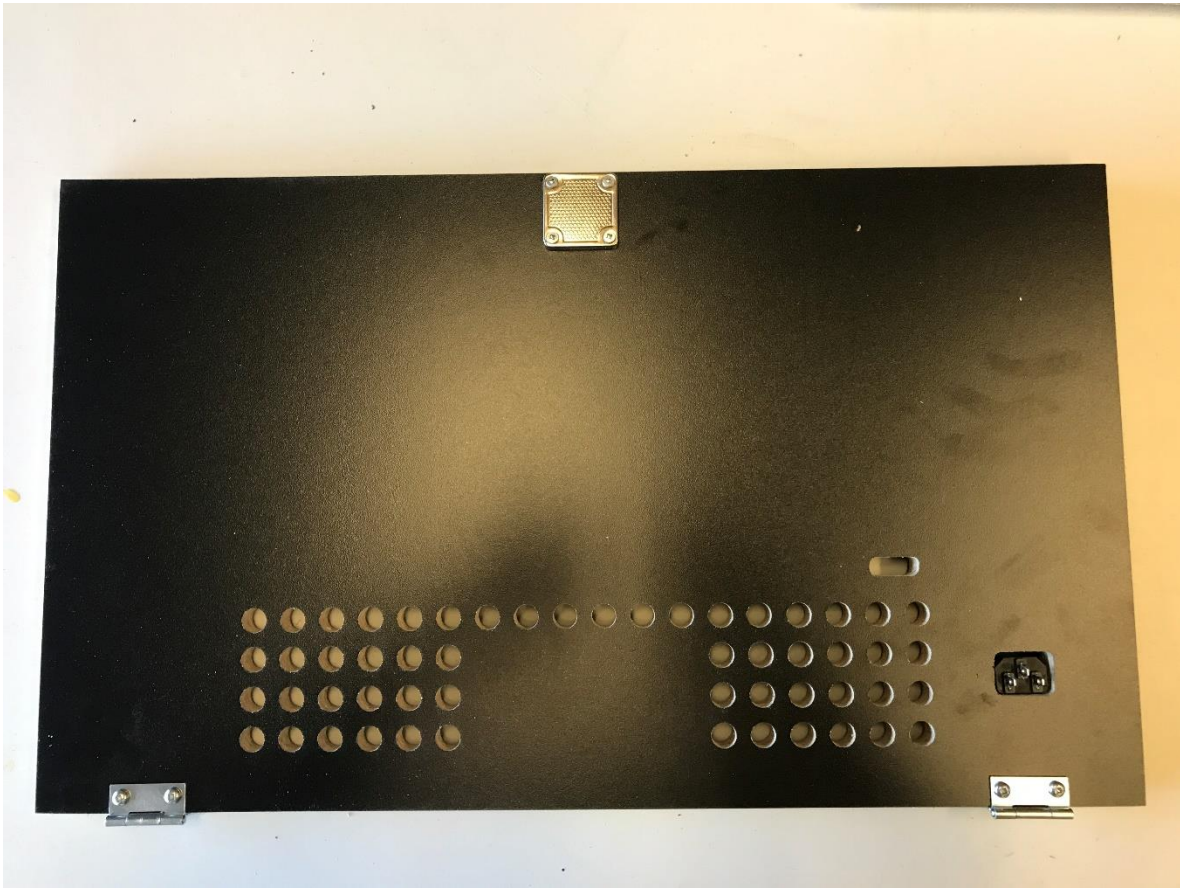

Speakers below are 2 ¼" and the Power Button below

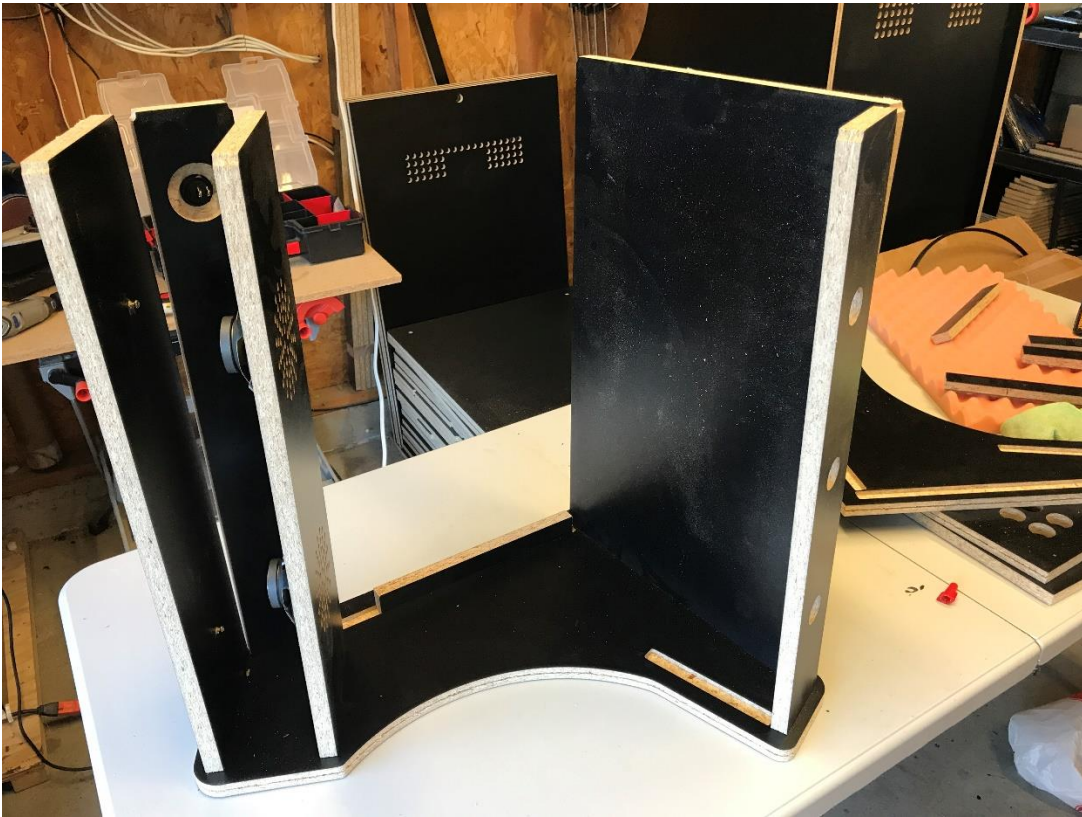

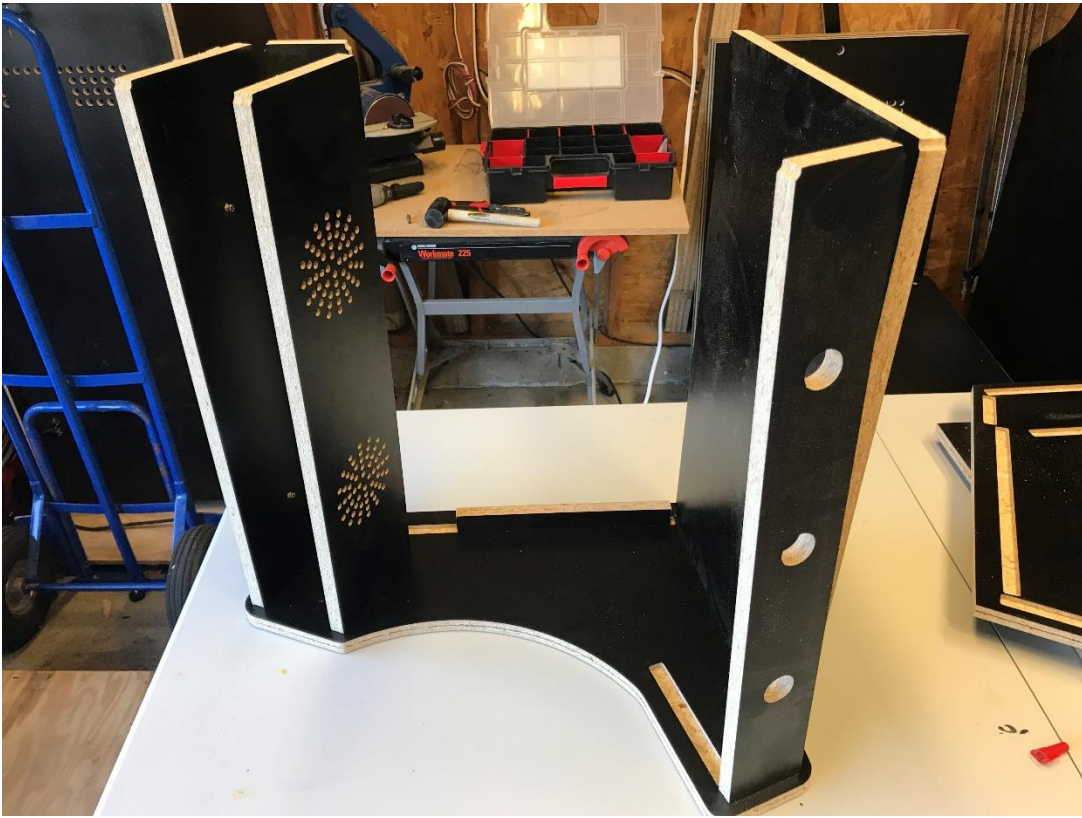

Screws for Marquee Light.

Lock, Hinges and Power Plug.

Lay the side panel on a table or floor, apply wood glue in the slots and install the panels.

Install the other side panel. I put glue in the slot and flip over and install. Some of the glue will run out but can be easily removed with damp cloth. If you have 24" clamps use them now before rotating cabinet. If you do not have clamps let glue dry.

Put Cabinet on your table to install the $\frac{3}{4}$ " L brackets.
